1 Guest editorial

3 Ageing of materials and methods for the assessment and extension of lifetimes of engineering plant
W. E. STUMPF (South Africa)

13 Implementation of creep–fatigue model into finite element code to assess cooled turbine blade
M. O. DEDEKIND (South Africa)

21 Evaluation of fracture toughness based on results of instrumented Charpy tests
W. SCHMITT, D.-Z. SUN, W. BÖHME & G. NAGEL (Germany)

31 Effects of temperature on the cyclic deformation behaviour and microstructural changes of 12Cr–1MoVW martensitic stainless steel
H. J. CHANG, C. H. TSAI & J. J. KAI (Taiwan)

41 The performance of Alloy 625 in long-term intermediate temperature applications
C. THOMAS & P. TAIT (New Zealand)

51 Thermal radiation effects and lifetime assessment of first wall materials
S.-S. HSU & C.-H. TSAI (Taiwan)

61 Fundamental modeling of environmental cracking for improved design and lifetime evaluation in BWRs
P. L. ANDRESEN & F. P. FORD (USA)

71 Isothermal aging test results (up to 100 000 h) of NiCrMoV steels for low-pressure steam turbine
Y. TANAKA, T. AZUMA & N. YAEGASHI (Japan)

83 Corrosion-assisted cracking in life optimisation of power plant components
G. GABETTA & F. BREGANI (Italy)

91 The high-temperature ageing of a low-alloy steel in the presence and absence of strain
F. H. VAN ZYL, J. P. STRYDOM, P. P. J. SMIT & R. EMMERICH (South Africa)

107 A new high-temperature creep-fatigue damage rule based on the strain range partitioning concept
K. TOKIMASA & M. MIYAHARA (Japan)

119 Uprating and life assessment under fatigue–creep conditions
W. J. PLUMBRIDGE (UK)

131 Fatigue life prediction in composites
R. J. HUSTON (South Africa)

141 A fracture mechanics based fatigue-creep-environment crack growth model for high temperature
S. KRUCH, P. PRIGENT & J. L. CHABOCHE (France)

149 Identification of creep damage variable from *A*-parameter by a stochastic analysis
Y. LIU, S. MURAKAMI & Y. SUGITA (Japan)

161 Safety of materials and structures in creep conditions
A. BODNAR, M. CHRZANOWSKI, P. LATUS & J. MADEJ (Poland)

175 Engineering codes for the analysis of structural integrity
D. O. HARRIS, C. H. WELLS, S. A. RAU & D. D. DEDHIA (USA)

185 Life assessment activities of fossil fuel power plant in the Republic of China
Y.-H. WU, C.-M. WU & H.-C. LAI (Taiwan)

197 Inordinate failures of rotating biological contractor (RBC) drive shafts in wastewater treatment plant service worldwide
B. ROSS, C. LANGE & R. BARRETT (USA)

211 Some remarks on the extension of civil engineering structures lifetime
E. URBAŃSKA-GALEWSKA (Poland)

217 Remaining load carrying capacity of gas pipelines damaged by surface corrosion
F. VALENTA, M. SOCHOR, M. ŠPANIEL & J. MICHALEC (Czech Republic)

227 Component life assessment methods for nuclear power plant
H.-C. LAI (Taiwan)

241 Approach to residual life assessment of large steam turbine components
A. CACCIALUPI, R. CRUDELI, G. P. FAZIO, F. PORRO, M. SANTORO & M. ZANNONI (Italy)

259 The determination of cost-effective NDE inspection schedules for structures containing defects based on probabilistic fracture mechanics
J. WANNENBURG (South Africa)

271 Magnetic testing methods of high-temperature steels
J. GINSZTLER, I. MÉSZÁROS, B. HIDASI & L. DÉVÉNYI (Hungary)

275 ESPI testing of Arcton containers
J. GRYZAGORIDIS & D. FINDEIS (South Africa)

281 Shape optimization of dynamically loaded machine parts
M. FANNI, E. SCHNACK & J. GRUNWALD (Germany)

299 Simulation of damage in industrial gas bottles
M. A. WEBER & R. K. PENNY (South Africa)

307 Assessment of fatigue life of engineering structures
K. M. GOLOS (Poland)

313 Reliability, uncertainties, their origins and consequences in presenting test results
C.-O. BAUER (Germany)

323 On the application of probabilistic fracture mechanics to the reliability and inspection of pressure vessels
C.-H. TSAI & W.-F. WU (Taiwan)

335 Uncertainties in the evaluation of high temperature damage in power stations and petrochemical plant
I. LE MAY (Canada), T. L. DA SILVEIRA (Brazil) & S. K. P. CHEUNG-MAK (Canada)

345 Legal requirements as to the structure reliability and consequences of damage analysis
C.-O. BAUER (Germany)
